Dear Commissioner Mayes;

August 21, 2005

This letter is regarding the outrageous request by Unisource Energy Services for a rate increase, way beyond reason. Why should the general public be gouged any more by this group who has bad management & doesn't know how to run a "Public Utility Company" and only wants it as a cash cow ???

I say no increase ! Let the CEO, CFO, COO and all the other higher echelon take a wage decrease, for they seem to think they can get away with bilking the people who have no other choice for their service and then walk away with millions of dollars & benefits when they retire with short time service in positions of power.

I for one happen to be mad-as-he- - and do not want to be taken for the ride of no return anymore. I feel the general public, we little guys, have been taken all of our adult, working lives by companies who work their evil ways around loop holes and such to scalp us anyway they can.

In general, retiree's do not have the luxury of having cost of living increases in their pension plans. We little guys don't get to walk away, if lucky enough to leave with a pension, the benefits & millions that these CEO power players gets for themselves & to He - -, with the little guys who work hard to make & keep a company productive, successful & solvent.

Therefore, I say again – NO INCREASE for UNISOURCE, they are not, NOT, worthy of a rate increase.

Thank you for your time & consideration on this matter.

Sincerely,

Robert E. Reed
